

Ali Qapu Palace, Isfahan

Summary

■ Equity Market

The Iranian stock market index fell by 2.5% in Euro terms, recording the second consecutive decline in May. We believe the single most important reason for the negative performance of the equity market in the last couple of months has been the impediments to foreign capital flows being able to find their way into the capital markets and into the economy in general. Another significant hurdle is the presence of the dual exchange rate structure. Despite the SWIFT system being available to all Iranian and International banks to transact through, the fact that transactions must be done at the official exchange rate of 30,500 Rials to the US\$ versus a parallel market rate of 34,500, has effectively precluded SWIFT as a way of transacting in the Rial.

■ Economic Review

This issue reviews the recent developments in the Tehran housing market, inflation and the banking sector's latest agreement on lowering deposits rates. In addition, we have included sections to cover the latest macro-economic data published by reputed organizations and senior macroeconomic strategists in a factsheet report and the economic calendar released by the Statistical Center of Iran.

Market Commentary

The Iranian stock market index fell by 2.5% in Euro terms, recording the second consecutive decline in May. The single most important reason we believe for the negative performance of the equity market in the last couple of months has been the impediments to foreign capital flows being able to find their way into the capital markets and into the economy generally. Another significant hurdle is the presence of the dual exchange rate structure. Despite the SWIFT system being available to all Iranian and International banks to transact through, the fact that transactions must be done at the official exchange rate of 30,500 Rials to the US\$ versus a

parallel market rate of 34,500, has effectively precluded as a way of transacting in the Rial.

However, the CBI governor has recently reaffirmed his commitment to unifying the exchange rates by the end of year, thereby facilitating the issue of money transfer by the banks. This will not only impact the capital markets but also will allow foreign capital to flow more easily into the Iranian economy. Given that the Iranian authorities would like to see a competitive currency, it is likely that any convergence in the rates will be towards the so-called free market rate.

However, there is a recognition that the two-tiered exchange rate mechanism needs to end as soon as possible for the sake of clarity in the business environment. The CBI governor has recently reaffirmed his commitment to unifying the exchange rates in the next 6 months or so, thereby facilitating the issue of money transfer by the banks.

In the financial community, it is assumed that the value of the Iranian Rial (IRR) in the free market will continue to stabilize over the short term. It is understood that

the Iranian government does not want to see a volatile currency, as it wishes to maintain current levels of competitiveness. Repatriation of frozen assets might exert appreciation pressure on the Rial, but the Iranian government has announced that it will not use unfrozen assets to strengthen the local currency. It is still unknown publicly exactly how much the unfrozen assets are worth. Estimations are ranging from US\$30 billion to US\$100 billion. We anticipate that after deducting outstanding debt, it is worth around US\$50 billion. Despite

these technical difficulties, the first major transaction through the SWIFT system was implemented in May to impact the capital markets where a German company has purchased a €51 million stake in an Iranian listed detergent manufacturer.

The overall situation with international banks and their willingness to transact with Iran shows daily signs of improvement. With the early adopters being mainly smaller European banks, it will probably take a longer time for the global banks with large US operations to become comfortable transacting with Iran.

Oil Exports on the Rise

With international vessels supporting Iran's own tanker fleet, traders say that oil exports (including condensates) are now close to pre-sanction levels of approximately 2.5m bpd. By this measure, Iran has ramped up both oil production and exports faster than expected. The IEA estimates Iran's sustainable production capacity at 3.6m bpd and we think such a level of production will be sustainable over the next 12 months.

Higher oil production, lower costs of trading and financial transactions, and restored access to foreign assets are expected to lift real GDP growth to 5% in 2016 from almost 0% in 2015.

Following this positive oil theme, India has made its first payment to Iran in four years to clear part of the US\$6.4 billion oil debt ahead of Prime Minister Narendra Modi's visit to Tehran.

Falling Interest Rates

With inflation coming down, the CBI is pushing banks to lower lending rates, having lowered the interbank lending rate from 28% to 17% over the past 12 months. We believe a further fall in interest rates is possible as the current real rates are in the range of 7.7% (Nominal interest rate: 15.0%, inflation rate: 7.3%). We estimate that nominal interest rates should decrease to about 12% in the next three years. Banks had a weak performance in May, losing 1% in value in the stock market as investors weighed on the structural problems in the balance sheet of the firms. According to CBI officials, Iran will start restructuring its banking sector this year using unfrozen assets to recapitalize banks. Banks will also get guidance on the transition to Base II banking regulations in the mid-term and will comply with international standards by joining to IFRS, by this calendar year.

Market Valuation

The likely impact of a real interest rate decline would be to give upward momentum to valuation multiples in the stock market such as P/E's which are now hovering around a relatively depressed level of 7.

Based on the Turquoise analytical database, we expect for a 10% earnings growth over the year to March 2017, giving a forward P/E for the market of around 6.3 times. With the equity market trading on a dividend yield of 13%, we see potential reductions in deposit rates as probably the biggest driver of equity market performance over the next year.

■ Highlights

Tehran Housing Market Positive Developments

The CBI's report included statistics for the housing market in Tehran in May 2016. The highest average transaction value was in district 1 (north of Tehran) at 78.3 million Rial (\$2,237 at a free market rate of 35,000 IRR/US\$) per square meter and the lowest was in district 18 at 21.4 million Rial (\$611) per square meter.

The weighted average price per square meter increased by 10% compared to the same period last year to \$1196 for residential units across the city.

Transactions between \$857 and \$1000 per square meter, were the most frequently transacted segment and accounted for 14.7% of total transactions. 50.7% of transactions were valued at higher than the average per square meter value (\$1196).

Small residential units with an area less than 80 square meters were the most frequently transacted units with a share of 56.1%.

The average rent for residential units in Tehran city increased by 9.7%, compared to the same period last year. This relatively modest increase in rental prices could be the result of falling inflation over the last two years. According to the CBI, rent is one of the main costs in household expenditure, accounting for 28.4%.

The stability of the housing market has encouraged investors to start returning to the market, with a modest increase of 8.2% in the number of transactions compared to the same month last year.

During the past two years, interest coming from investors was the result of a slight decline in prices which, suggested minimal inflationary pressures in the market. The 10% increase in the weighted average price per square meter in May 2016, supply of unsold units, positive macroeconomic outlook and a stabilized provision of housing mortgages from the banking sector are all expected to stabilize the market, especially in zones with lower market value.

Frequency Distribution: Number of Housing Transactions by Price Range Per Square Meter

Summer 2016: Single Digit Inflation with Deposits Rates to Decline to 15%

The current 11% gap between interest earned on deposits (18%) and year-on-year inflation (7.3%) is expected to decline further over the next few months. According to the Central Bank and the Association of Private Banks and Credit Institutions, large private banks have agreed to cut deposit rates by a further 3% in June 2016, reducing the real deposit rate to 7%. With the equity market trading with a dividend yield of 13%, these potential reductions are expected to reduce investor appetite for funds held in bank deposits and to encourage investors to shift these to real estate, fixed income and equity markets.

On the other hand, in line with government plans to establish a strong and regulated public debt market, the government recently submitted to parliament an amendment proposal to the budget bill. It is hoped that the new parliament will agree to allow the government to clear its debts by issuing Islamic Financial Instruments in the debt market. If these amendments are implemented, the banking sector's liquidity will be improved as the government is one of the largest banking sector borrowers. It is estimated that by approving this amendment, financial instruments with a value of \$8 billion will be issued in the debt market as sovereign bonds or Islamic treasury bills.

According to the Money and Banking Research Institute, the inflation rate is expected to peak at a single digit this summer, while resolving the banking sector's liquidity constraints is a top priority.

Consumer Price Index

The Consumer Price Index stood at 238.1 in May 2016, marking a 0.9% increase from the previous month, and an increase of 7.3% from May 2015. Year-on-year, 'Services' (including education and healthcare costs) increased by 12.7% and 'Consumer Goods' prices increased by 3.7%. Overall, the 12-month urban inflation rate for the year ending May 2016 was 11.2%.

■ About Turquoise Partners

Since 2005

Turquoise is a leading investment group based in Iran that offers a wide range of financial services to select investors looking at the Iranian market. The group operates across four core areas: investment management, brokerage, corporate advisory and private equity/venture capital. Turquoise also manages more than 90 per cent of all existing foreign portfolio investments on the Tehran Stock Exchange. Its asset management division offers an equity fund tailored specifically to foreign investors and invests exclusively in the Iranian securities markets. The fund is jointly advised by Turquoise Partners and emerging market specialist Charlemagne Capital.

Firouzeh Asia, the group's brokerage division, is the market leader in foreign investment and execution, and the provision of English language market research, news and analysis. In addition, Turquoise is the only Iranian financial services group to have a significant track record in private equity investing and currently manages two listed private equity investment vehicles.

Turquoise's corporate finance team offers a full suite of advisory services including mergers and acquisitions, restructuring, market entry and capital raising for international clients seeking to enter the Iranian market as well as leading Iranian companies.

The group produces a widely read monthly electronic newsletter «Iran Investment Monthly» which provides the latest news on Iran's financial market and economy in English.

Asset Management

Turquoise Asset Management has established an outstanding reputation and robust performance record in the Iranian equities market. The group is known as a leading investment firm with a strategy of value investing and long term capital growth; it specializes in attracting foreign investors to invest in one of the most undervalued financial markets in the world.

Our investment team is comprised of experienced professionals with more than 20 years experience across international and domestic financial markets. Our investment decisions are guided and supported by our investment and advisory committees, access to detailed market information, and our on-the-ground presence in Iranian financial markets over the last 10 years.

Our commitment to maintaining high standards along with our long term growth strategy has led to us gaining an unparalleled reputation as the leading asset management firm inside Iran.

Asset Management Division: Products & Services

- ◆ Turquoise Partners launched Iran's first equity fund in May 2006, tailored for foreign investors. With over 10 years of track record, the fund has grown to be the largest foreign investor on the Iranian capital markets. The investor base of this fund is almost all European with a mix of institutional, family offices, high net worth individuals and private professional investors.
- ◆ In 2015, Turquoise Partners and Charlemagne Capital launched the first EU regulated alternative investment fund for Iran. This fund is now operational and is open to global investors aiming to get exposure to the Iranian market.

- ◆ Having operated in the Iranian market for over a decade, Turquoise has accumulated a first rate database of market data and information. The firm's electronic newsletter, Iran Investment Monthly, has been consistently published for over 10 years and has a wide readership of over 3,000 investors and Iran enthusiasts. This newsletter and other regular research products of the firm, are the only free source of English language research on the Iranian economy and the capital markets.

For more information about products and services offered by Turquoise Partners please contact: info@turquoisepartners.com

Corporate Advisory

Turquoise is the leading investment group based in Tehran. We have 10 years of transaction experience on the ground in Iran and an extensive network of partnerships and collaborations with international investors and leading global advisory firms.

Our corporate finance team is comprised of senior Iranian and international bankers based locally and in London. We deliver mergers and acquisition advisory, restructuring, market entry and capital raising services to international clients seeking to enter the Iranian market. We also assist Iranian domestic corporates to access global markets through strategic partnerships. We seek to combine in-depth local knowledge and access with international investment banking best practice.

In cooperation with Turquoise's market leading equity brokerage, we deliver capital markets services, including public markets capital raising and structured products, to Iranian corporate clients and foreign and domestic institutional investors.

Corporate Advisory Division: Products & Services

- ◆ Advisory Reports: in-depth research reports tailored to the corporate advisory division's policies, providing due diligence research on specific listed or non-listed companies and their sectors' outlooks, in English.

Brokerage

Firouzeh Asia, the brokerage arm of Turquoise Partners Group, is the leading broker offering access to Iranian securities markets for international investors. Over the years, Firouzeh Asia, as a fully licensed brokerage company under the Securities and Exchange Organization of Iran, has been a pioneer in servicing international investors as well as offering professional services to its domestic clients. Firouzeh Asia has a presence in four major Iranian cities: Tehran, Isfahan, Rasht and Yazd.

Brokerage Division: Products & Services

- ◆ Securities Dealing
 - ◇ Online trading platform with live market data for all customers
 - ◇ Telephone orders
 - ◇ Block trades
 - ◇ Dedicated trading station for large customers
- ◆ Managed Accounts
 - ◇ Investment Advice (institutional clients only)
- ◆ Capital Market Advisory
 - ◇ Listing and IPO advisory
 - ◇ Fixed income securities issuance and placement
- ◆ Index ETF
 - ◇ Launch of Iran's first index-linked ETF (TSE-30 ILETf) in January 2015
 - ◇ Client Portfolio Management
- ◆ Equity Research Report: an in-depth research report tailored to the Turquoise Investment Strategy which provides the latest developments in a selected number of listed companies (including their sectors), in English.

For more information about products and services offered by Turquoise Partners please contact: info@turquoisepartners.com

Private Equity

Turquoise is one of the only Iranian financial firm with a significant track record in private equity investing. Our investment team has been working since 2005 and has invested on its own behalf, with co-investment partners, and as a manager in the most attractive growth sectors of the Iranian economy. Transactions have included private investments in FMCG, financial services, real estate and technology-based venture capital.

Our private equity capabilities include experience in all phases of the investment process including market analysis, due diligence of investees in the Iranian environment, interface with regulators and other governmental authorities, investment restructuring, exit management and undertaking all the reporting and investment monitoring expected of a private equity fiduciary.

Private Equity Division: Products & Services

- ◆ Private Equity Fund: Turquoise launched the first Iran-focused private equity fund with a Swiss-based bank. The fund mainly invests in Iranian consumer goods, pharmaceuticals, consumer finance and hospitality.

Turquoise Partners accepts no liability whatsoever for any direct, indirect or consequential loss or damage of any kind arising out of the use of all or any of this material. Where Turquoise Partners provides information in the document, it is provided exclusively for information purposes. The information does not constitute any form of recommendation related to the personal circumstances of investors or otherwise, nor does it constitute any specific or general recommendation to buy, hold, or sell financial instruments and does not thus create any relationship between Turquoise Partners and any investor. The document may not include all the up-to-date information required to make investment decisions. Other more accurate and relevant sources of information may exist. Investors should thus diligently inform themselves about the chances and risks of the investments prior to taking investment decisions. In addition to the financial aspects, this should include, in particular, the legal and tax aspects of the investments. It is strongly recommended that any potential investor should contact a financial adviser and, where required, a lawyer or tax adviser. Furthermore, it should also be considered that the future performance of financial instruments and their return cannot be inferred from their past performance. The value of investments may go down as well as up and investors in financial instruments should be capable of bearing a total loss of investment. Neither Turquoise Partners nor any third party content provider shall be liable for any errors, inaccuracy, delay or updating of the published content of the provided document. Turquoise Partners expressly disclaims all warranties as to the accuracy of the content provided, or as to the use of the information for any purpose, as far as legally possible. This material is for the use of intended recipients only and neither the whole nor any part of this material may be duplicated in any form or by any means. Neither should any of this material be redistributed or disclosed to anyone without the prior consent of Turquoise Partners. PERSONS DOMICILED, RESIDENT OR BASED IN THE UNITED STATES OF AMERICA ITS TERRITORIES OR POSSESSIONS OR WHO MAY OTHERWISE BE CONSIDERED AS UNITED STATES PERSONS, INCLUDING REPRESENTATIVES OF UNITED STATES COMPANIES OR NON-UNITED STATES SUBSIDIARIES OF UNITED STATES COMPANIES SHOULD NOT CARRY OUT ANY ACTION IN BREACH OF U.S. SANCTIONS LAWS.
